Professional Experience

Software Engineer

Vara Infrovate Pvt. Ltd.

07/2023 – present | Kolkata, India

- Engineered **scalable** backend services using **NestJS & Golang (Gin)**, improving API throughput and reducing response latency by **~20%**; further optimized Hyperledger Fabric (HLF) **bulk certificate hashing** by offloading synchronous processing into Cron-based async pipelines — cutting 100+ certificate upload time from **>2 mins to near-instant**.
- Built **dynamic, high-performance** UIs using **React/Next.js** — implemented **lazy loading** for heavy certificate datasets, implemented **code-splitting (React.lazy + <Suspense>)**, and optimized rendering using **useMemo/useCallback/Context API**, resulting in **~25%** faster load & interaction time measured through **Lighthouse Performance Audits**.
- Integrated **video KYC** with LiveKit and **real-time chat** via **WebSockets**.
- Led AI workflows using **OCR** (PaddlePaddle, Tesseract) and **NER** (SpaCy), increasing data accuracy.
- Built **multi-tenant issuer onboarding system** for blockchain-based certificate issuance — orchestrated automated server + isolated DB provisioning per issuer using **Docker containers**, enabling **scalable** and **secure** organizational onboarding.
- Managed **AWS** deployments with **Docker**, achieving **99.95%** uptime.

Developer Intern

Vara Infrovate Pvt. Ltd.

01/2023 – 07/2023 | Kolkata, India

- Contributed to Blockchain backend development as an **on-the-job** trainee using **NestJS**.
- Designed and implemented **database models** and **APIs** in collaboration with the team.
- Built scalable backend systems with **Prisma** and documented them using **Swagger**.

Achievements

Language & Problem Solving

- Achieved 5★ in **C++**, **SQL**, and **Problem Solving**; 4★ in **C** on **HackerRank**.
- Solved over **350 DSA** problems across **GeeksforGeeks** and **LeetCode**.

Skills

Languages: TypeScript | Python | C++ | SQL | Golang | HTML | CSS | EJS

Frameworks: NodeJs | NestJs | NextJs | ReactJs | ReactNative | ExpressJs | Gin | FastAPI | TailwindCSS | Web3Js

Databases: PostgreSQL | MongoDB | SQLite

AI & Data: PaddlePaddle | SpaCy | Pandas | Tesseract | ChatGPT API

DevOps: Docker | AWS | Git | Github Actions

ORMs: Prisma | TypeORM | Mongoose

AI Tools: ChatGPT | Bolt | Gemini | Claude | Windsurf | Cursor | Warp Terminal | Stitch

Projects

Smart Ingredient Analyzer

AI-powered app for scanning and analyzing food/cosmetic ingredients.

05/2025 – 05/2025

- Developed a cross-platform mobile app using **React Native** and **FastAPI** to scan and **analyze product ingredients** via image capture.
- Engineered **AI-driven insights** engine by integrating **Tesseract OCR** for precise text extraction and **ChatGPT API**, resulting in **95%** accuracy in ingredient analysis.

Whatsapp Chat Analyzer

Turning Conversations into Insights

03/2024 – 03/2024

- Developed a complete WhatsApp **chat analysis tool** with intuitive **visualizations** (Bar, Line, Heatmap, Word Cloud) to highlight conversation trends.
- Engineered smart **metrics** and **algorithms** to reveal key patterns like busiest user, peak activity hours, total messages and media engagement.

Education

B.Tech - Computer Science and Engineering

Sister Nivedita University - CGPA: 8.48/10

07/2019 – 07/2023 | Kolkata, India
